

Data as of: 31-05-2022

General investment policy

The main objective of the Hermes Universal - ONE Dynamic sub-fund is to maximize the growth of invested assets. The sub-fund will invest in equities and fixed income products in order to achieve the requested risk profile. The sub-fund will invest between 40%-100% of its assets in equities. By means of top-down active asset allocation between asset classes as well as within asset classes, an optimal risk-return portfolio is targeted.

Sustainable investment policy

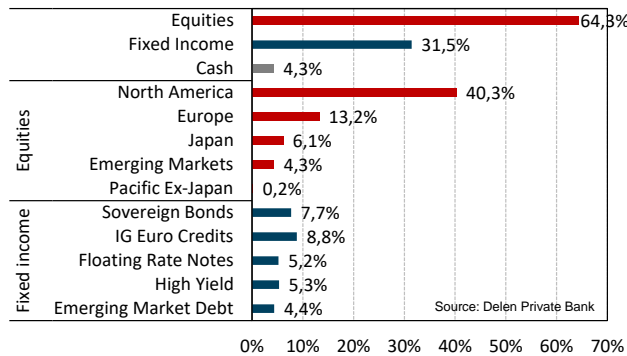

Environmental and social characteristics are fully integrated into the investment process as follows:

- ✓ Application of an exclusion policy to filter investments and monitor existing investments.
- ✓ The Investment Manager's engagement. Engagement refers to the continuous and constructive dialogue between the Investment Manager and the investments in which each Fund invests.
- ✓ Consideration of non-financial parameters. The Investment Manager analyses parameters such as turnover, profit, margins and market share of the companies in which each Fund invests. Investments with an ESG score below a predefined threshold are not taken into account in the selection and the ESG score is integrated into the investment decisionmaking process.

NAV evolution of HU ONE Dynamic B Cap* since launch

Asset Allocation

Annual performance (net of fees) (1jan - 31dec)

EUR	2019**	2020	2021	YTD
HU ONE Dynamic B Cap*	-49,5%	4,4%	15,5%	-8,4%

**The performance does not represent a full calendar year, as the shareclass was launched after 1 January 2019.

Annualized return (net of fees) as of 31-05-2022

EUR	3 years	1 year	since launch
HU ONE Dynamic B Cap*		-1,1%	-44,2%

*Past performance is not a guarantee or a reliable guide to the future. Market and exchange rate movements may cause the capital value of investments, and the income from them, to go down as well as up and the investor may not get back the amount originally invested.

The performance calculation takes all fees into account except eventual subscription or redemption commissions.

Risk and return profile

This synthetic indicator represents the historical volatility of the fund over a period of 5 years (market risk).

- Historical data, such as those used to calculate the synthetic indicator, are not always a reliable indication of the fund's future risk profile.
- It is not certain that the risk/return category remains unchanged.

- The classification of the fund is likely to change over time.
- The lowest category is not synonymous with a risk-free investment.
- The Sub-Fund is likely to invest in a broad range of assets with different volatility, that is why this share class is in this category. The risk and reward profile shown is not guaranteed to remain the same and may shift over time.

Other risks that are essential for the fund and not (sufficiently) covered by the synthetic indicator:

- Currency risk: the fund's reference currency is the euro and generally 55% to 85% of the portfolio is invested in a currency other than the euro, which gives an average exchange rate risk.

For a complete overview of the fund's risks, please refer to the risk section in the prospectus.
